Water filter systems

The quality of the water you use to make a warm beverage affects its taste, aroma and clarity. But water can also cause scale build-up in your machine. This can result in unscheduled and expensive service calls or even loss of turnover if you are temporarily unable to serve drinks. Prevent annoyance by using Bravilor Bonamat filter systems that filter out odours and tastes such as chlorine and reduce water hardness. That way, you are ensured of an excellent drink and a longer machine life.

The taste of quality worldwide

BRAVILOR BONAMAT

Bravilor Bonamat equipment is less prone to scale build-up by design. Nonetheless, calcium can be a frequently occurring problem especially in areas where the water is hard. The BSRS 200 protects your equipment from the damaging effects of scale build-up and ensures a constant water quality. Even though you may have no major scale problems you want to ensure that you get beverages with optimum taste. We recommend that you use the BWFS 100, which is specially made for use in areas with soft water. The filters are suitable for all Bravilor Bonamat equipment connected to the mains water supply.

Water filter systems highlighted

- Constant water quality
- Protect hot beverage equipment from scale build-up
- Take up a minimum of space
- Rapid and simple changeover: built in water shut-off
- Regeneration not necessary
- Low investment costs
- Complete set: filter head, filter and connection hoses
- Replacement filters available separately

BSRS 200 (Bravilor Scale Reduction System)

- Prevents scale build-up and protects your equipment
- Active carbon for an optimum taste, aroma and clarity of your hot beverage
- Use with average to very hard water (≥ 7 °dH)
- Works on the basis of ion exchange

BWFS 100 (Bravilor Water Filtration System)

- Active carbon for an optimum taste, aroma and clarity of your hot beverage

Technical details	BWFS 100	BSRS 200
Capacity	5.600 litres	1.600 litres (10 °dH)*
Capacity per minute	2,84 litres	1,9 litres
Dimensions (wxdxh)	81x105x305 mm	81x105x500 mm
Replacement filter	BWFS-C-100	BSRS-C-200

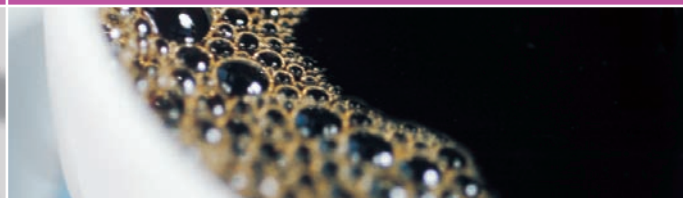

* Depends on water hardness, see table below

BSRS 200 capacity

Water hardness (°dH)	Capacity in litres for replacement*	Number of cups (100 ml)*
2,5	6.000	60.000
6	3.000	30.000
8,5	2.000	20.000
11	1.500	15.000
15	1.200	12.000
17	1.000	10.000
19	857	8.571

* Approximately

Closed connection: the unique filter head is suitable for Bravilor Bonamat filters only.
